

Risk Management and Insurance

Risk Management and Insurance, is intended for volunteer based organizations. This course defines the goal of risk management and discusses the elements of an effective risk management process. The course is designed to address the levels of risk inherent to specific volunteer positions and examine the role of insurance in risk management.

The course consists of the following units:

Unit One	The Risk Management Process
Unit Two	Risk Management and Insurance

Course Objectives

The main purpose of the course is to define the goal of risk management, identify and explain the steps involved in this process including the use of risk management tools. Information pertaining to the recognition of the importance of the interviewing and the screening of volunteers, as well as the use of technology within an organization is provided. The course is designed to identify the risk levels within various volunteer positions, the risk management issues faced by board members and the tools that can be used to minimize these risks. In additions, this course explains the factors that must be considered when developing supervision strategies.

Evaluation Process

At the end of each unit, there is a quiz that each course participant must challenge and successfully complete with a passing grade before continuing to the next content unit.

Course Duration:

The course is self paced so course duration will depend on the individual participant and their prior knowledge base with the course subject matter. On average, the course will take between 1.5 to 3 hours to complete.

Who Should Take the Course?

The course is intended for volunteer-based organizations and the individuals involved in the implementation of a Risk Management Process. This course also applies to those employees, managers or board members who address the levels of risk associated with volunteer positions and examine the role of insurance in risk management within their organization.
